

Corporate Capabilities

Company Overview

Cyber Force One (CFONE) builds, secures and operates enterprise-class information technology systems for federal, state and local governments as well as commercial clients. As an IT solutions provider based near Washington, DC, our engineers, analysts, compliance experts and project management team work together with our clients' stakeholders to implement solutions that protect systems and streamline, optimize, and maximize business performance. Our mission is to provide stellar, cost-effective services and successful outcomes to our clients as a premier IT consulting services firm. Striving always to surpass client expectations, we are guided in our work by our core principles: customized service, value delivery, comprehensive excellence and equal opportunity.

Department of Homeland Security

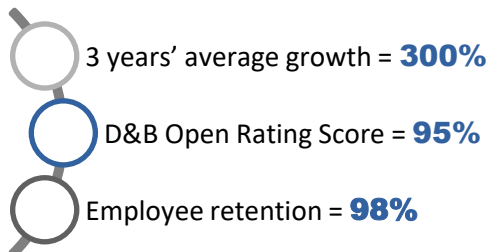

- CFONE provides a wide range of skillsets and capabilities to support the DHS Data Center and Cloud Optimization Support Services (DHS DCCO) contract: security operations center (SOC) services — including incident management/response, security monitoring, Information System Security Officer (ISSO) support, FISMA compliance, security engineering resources, and vulnerability management — as well as risk and compliance services, cybersecurity governance, management of cloud-based computing services, end-to-end technical requirements management for enterprise IT services, program management, application integration, business and requirements analysis, integration, testing, change management, innovative architectural support, and ongoing cloud and application management.
- Our team supports the U.S. Coast Guard Information Management Services (IMS) with cybersecurity governance and risk and compliance services, including ISSO support responsible for day-to-day oversight of FISMA compliance functions and transition support.
- CFONE performs cybersecurity governance and risk and compliance services in support of the Transportation Security Administration (TSA) IMPACT II IAD, including ISSO support responsible for day-to-day oversight of FISMA compliance.

Pyramid Systems, Inc.

- CFONE conducted the program audit of a Pyramid system, validating that security controls were operating as intended while providing a secure system that protected the confidentiality, integrity, availability and privacy of the client's data. We also reviewed contractual and security requirements against industry best practices (e.g., FISMA. NIST. FedRAMP).
